European Journal of Operational Research 69 (1993) 510–511
North-Holland

Contents Volume 69

1 Integrating production and quality control policies: A survey (*Invited Review*)
S.K. Goyal, A. Gunasekaran, T. Martikainen and P. Yli-Olli
14 The growth of exhaustion
K.B. De Greene
26 Energy use in Greek manufacturing, 1970–1989
G. Cosmetatos, J. Leon, A. Skaleou and G. Skourtias
38 A generalized model for determining optimal number of minimal repairs before replacement
S.-H. Sheu
50 An optimal operation policy for real-time n-server stand-by systems involving preventive maintenance
J. Kreimer and A. Mehrez
55 Multivalued continuum systems
J. Montero, J. Tejada and J. Yáñez
65 Heuristic testing procedures for general coherent systems
Y. Qiu and L.A. Cox, Jr.
75 A note on optimal replacement policy under general repair
V. Makis and A.K.S. Jardine
83 Training neural networks with the GRG2 nonlinear optimizer
M.S. Hung and J.W. Denton
92 Timetable construction with Markovian neural network
M. Kovačič
97 An algorithm for the ranking of shortest paths
J.A. Azevedo, M.E.O. Santos Costa, J.J.E.R. Silvestre Madeira and E.Q. Vieira Martins
107 Small and large TSP: Two polynomially solvable cases of the traveling salesman problem
R. van Dal, J.A.A. van der Veen and G. Sierksma
121 A cutting-plane approach to the edge-weighted maximal clique problem
G. Dijkhuizen and U. Faigle
131 Generating the best K sequences in relocation problems
B.M.-T. Lin and S.-S. Tseng
138 OR Software, *H. Thiriez (ed.)*
140 Short Book Reviews *L.F. Gelders (ed.)*

143 Optimal incentives and asymmetric distribution of information (*Invited Review*)
T. Hartmann-Wendels
154 On the (t, S_j) policy in an integrated production/inventory model with time-proportional demand
J.-D. Hong, T.M. Cavalier and J.C. Hayya
166 Buffer levels and choice of material handling device in Flexible Manufacturing Systems
B. Mahadevan and T.T. Narendran
177 A duopoly model of pricing for inventory liquidation
S. Bikhchandani and J.W. Mamer
187 The job shop tardiness problem: A decomposition approach
N. Raman and F.B. Talbot
200 Preference simulation and preference programming: robustness issues in priority derivation
A. Arbel and L.G. Vargas
210 A multicriteria evaluation of methods for obtaining weights from ratio-scale matrices
B. Golany and M. Kress
221 The long-term elasticity of the milk supply with respect to the milk price in the Netherlands in the period 1969–1984
J.H.J. Roemen
238 Simulated annealing for the QAP – Optimal tradeoff between simulation time and solution quality
P.S. Laursen
244 A knapsack program generator of fractal curves with random stopping rule
A. Bellacicco and L. Miccoli
250 Approximate techniques for general closed queueing networks with subnetworks having population constraints
B. Baynat and Y. Dallery

265 Mean-variance criteria in an undiscounted Markov decision process
K.-J. Chung
277 OR Software
ORSEP – Operations Research Software Exchange Program, *H.W Hamacher (ed.)*
WHAP, *R.L. Francis, C.M.C. Lindemalm and K.I. Olssen*
279 Call for Papers

Special Issue on Cellular Manufacturing Systems

281 Editorial
N. Singh
284 Design of cellular manufacturing systems: An invited review
N. Singh
292 A work load-oriented heuristic methodology for manufacturing cell formation allowing reallocation of operations
S.-L. Kang and U. Wemmerlöv
312 Cell formation in PCB assembly based on production quantitative data
D. Luzzatto and M. Perona
330 A mathematical model for cell formation considering investment and operational costs
G.K. Adil, D. Rajamani and D. Strong
342 An improved neural network leader algorithm for part-machine grouping in group technology
S. Kaparthi, N.C. Suresh and R.P. Cerveny
357 A novel machine grouping and knowledge-based approach for cellular manufacturing
W.S. Chow and O. Hawaleshka
373 On cell size and machine requirements planning in group technology systems
S. Sankaran and R.G. Kasilingam
384 Worst-case analysis of an algorithm for cellular manufacturing
S.M. Ng
399 Optimization analysis of flexible cellular manufacturing: Route selectionand determining the optimal production conditions for ordered products
S. Song and J. Choi
413 Setup time reduction and competitive advantage in a closed manufacturing cell
J. Yang and R.H. Deane
424 Manufacturing cell operating characteristics
L. Lin and F. Chiu
438 A comparison of scheduling philosophies for manufacturing cells
R.G. Askin and A. Iyer
450 A comparison of buffering strategies for the CMS routing/sequencing problem
G. Don Taylor and H.A. Taha
467 Two-machine group scheduling problem with blocking and anticipatory setups
R. Logendran and C. Sriskandarajah
482 Dynamic sequencing of robot moves in a manufacturing cell
S.-C. Liu and L. Lin
498 Cellular control of manufacturing systems
F. Della Croce, G. Menga, R. Tadei, M. Cavalotto and L. Petri
507 Contents Volume 69
